

#### Setting the Context

John Finnie
CAVI Chair

Rod Sherrell
AVICC President

Tim Pringle
REFBC Executive Director

### CAVI Explained

It started with an idea and a conversation: Parksville 2005 and 2006.

It is about sharing knowledge and ideas.

It is about creating partnerships.

So who is CAVI?

#### What Does CAVI Do?

CAVI brings together those who plan and regulate (local government), those who build (developers) and those who provide the legislative framework (the Province).

CAVI provides support to organizations with a focus on water sustainability, and helps them develop and share their ideas and successes so that others can see how they too can get on board.

The CAVI Vision: By 2010 Vancouver Island will be well on its way to achieving water sustainability

CAVI promotes a *Design with Nature* way of thinking and water-centric planning to create livable communities in balance with ecology

## Where and how land is developed determines....

- How water is used
  - sustainability of supply
- How water runs off the land
  - sustainability of terrestrial and aquatic habitat

...so, mimic the natural environment!

#### "What the cell is to the body, the site is to the region"

Patrick Condon, 1998 University of British Columbia

### Let's visualize what we want Vancouver Island to look like:

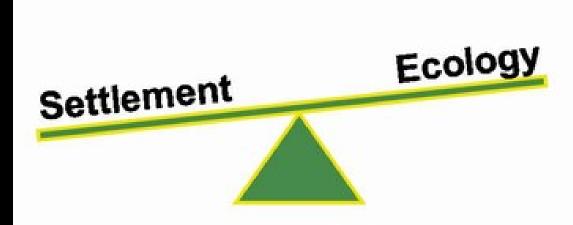

The Leadership Forum is the start of a conversation about *Why, Where* and *How* development should occur so that Settlement is in balance with Ecology

# After today, our hopes for tomorrow are...

We hope to develop an ongoing conversation about planning that results in good decisions for the future needs of our communities.

We hope to move beyond awareness of big picture issues to local actions that help Island communities develop solutions to their specific challenges

## A Positive Settlement Strategy means Benefits Exceed Liabilities

Settlement is human activity of any kind upon the land. It is habitation. Habitation is layered systems. Ecology is natural systems. It is water, climate, flora and fauna, and their relationships.
