Computer Science  
Building

University of Victoria

Thank you  
to our sponsors!

This workshop is funded in part  
through the Ministry of Energy, Mines  
and Petroleum Resources Community  
Action on Energy Efficiency Program

# Is Smaller Smarter?

We seem to be building larger and larger homes for smaller and smaller families. Even if our homes are built to be energy-efficient, this still means larger spaces to heat, and more resources to build these larger homes. This panel session—with input from the audience—will explore what is driving the 'McMansion' trend, and ways to encourage smaller homes with a smaller sustainability footprint.

## REGISTRATION

FREE!
