

A photograph of a gravel path with two parallel stripes of green grass. To the right, there is a wooden fence. The path is surrounded by lush greenery, including tall grasses and flowering plants. In the background, a car is parked on a grassy area.

Green Infrastructure Innovation: *On the Ground Successes*

**Green Infrastructure
Roundtable: *Sharing Lessons
Learned***

Storytellers

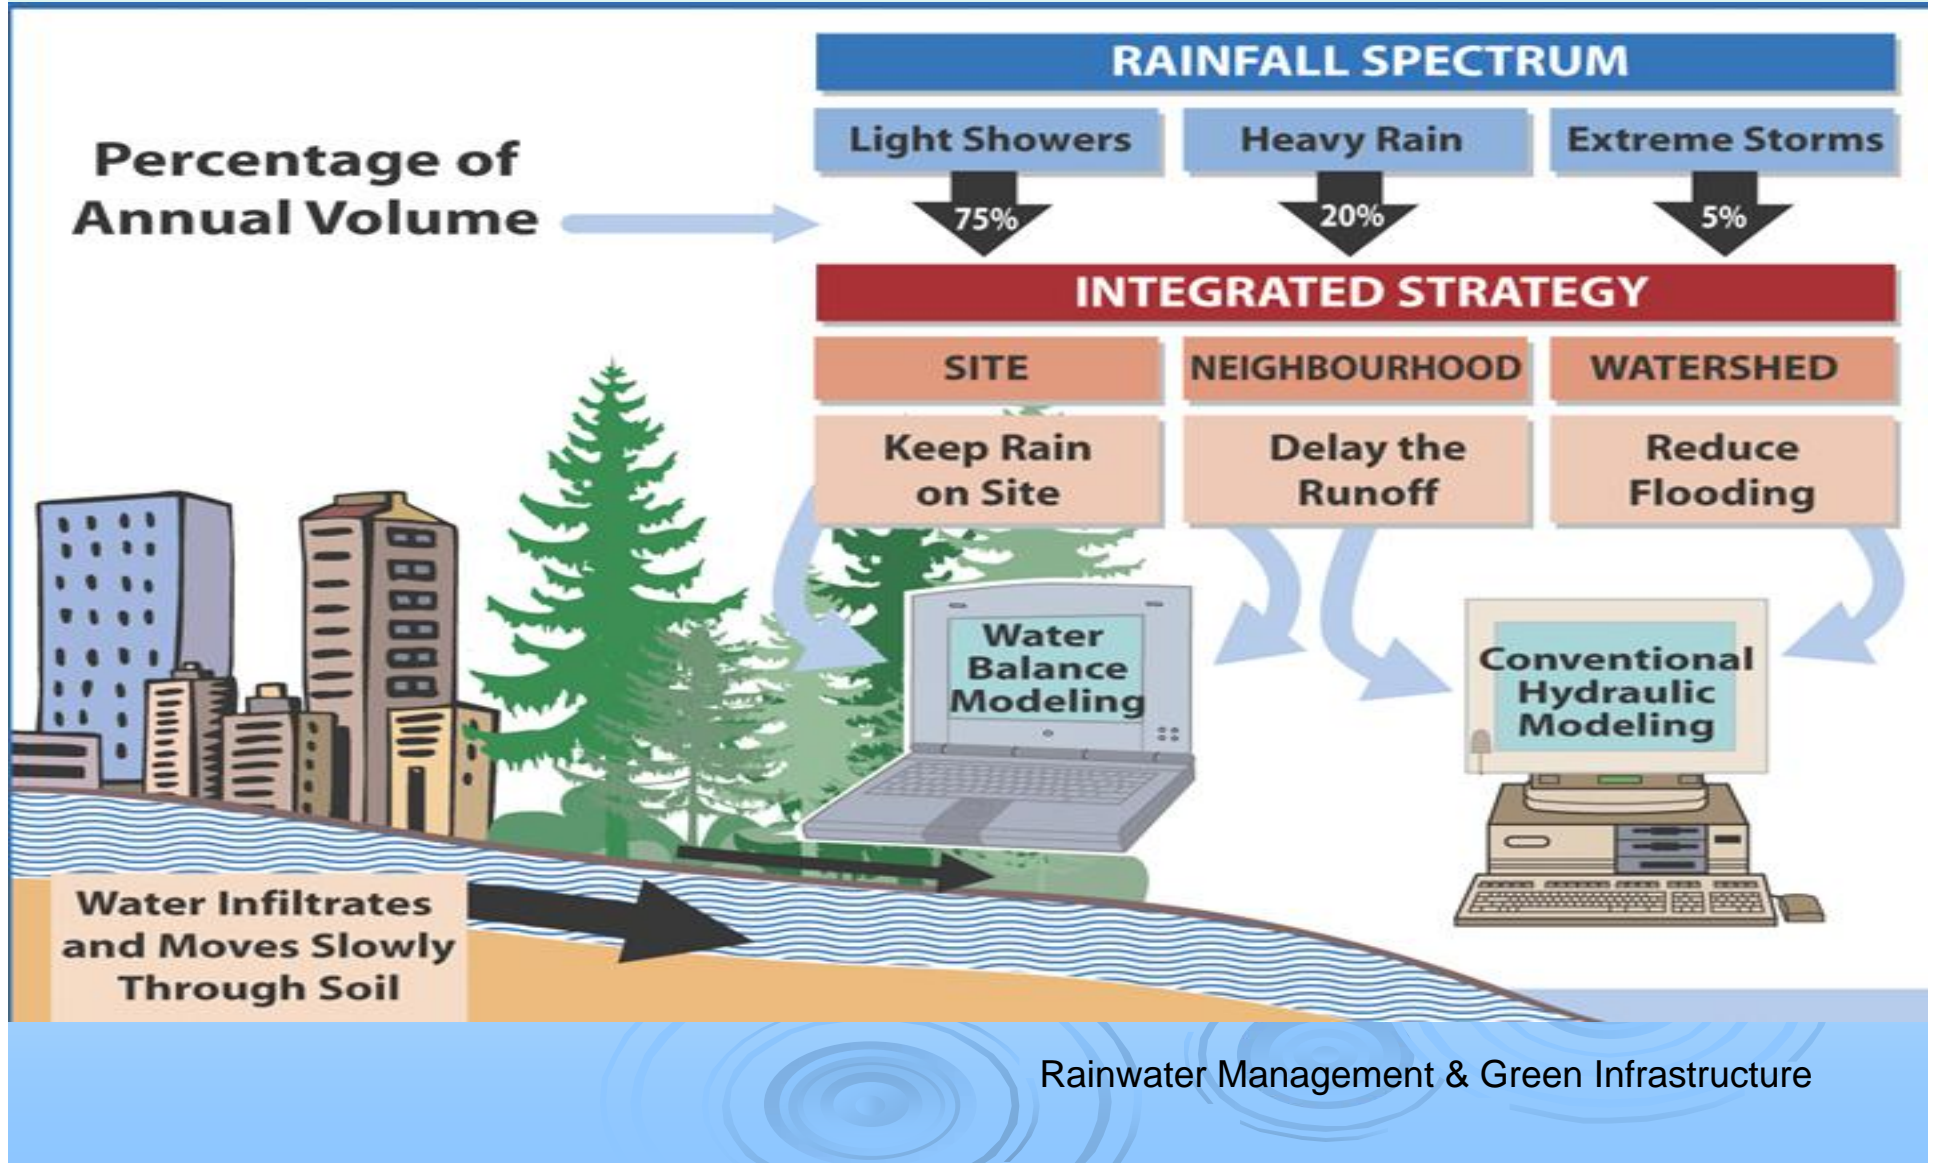

- **Richard Boase, P.Geo.**, Environmental Protection Officer, District of North Vancouver
- **David Desrochers, P.Eng.**, Manager, Sewer & Drainage Design, City of Vancouver
- **Raymond Fung, P.Eng.**, Manager, Utilities, District of West Vancouver

The Challenge

- How to develop land *and* manage rainwater for environmental benefit?

The Way Forward

Why?

- DFO requires it!
- Municipalities support it!
- Public expects it!

Success Factors

- Integrated design team
 - Developer
 - Consultant
 - Municipality

Build on Pilots

- Learning comes from experimentation
- Don't be afraid to make mistakes
- Sea change comes from building on each others successes

Rainwater Management & Green Infrastructure

So what's your story?

Rainwater Management & Green Infrastructure
